Contents

Special Focus on Uncertain Information Networks

- Clock synchronization algorithms for networked systems 1527
Minrui FEI, Nan XIONG & Tao LI
- Semi-tensor product of matrices approach to stability and stabilization analysis of bounded Petri net systems 1542
Xiaoguang HAN, Zengqiang CHEN, Zhongxin LIU & Qing ZHANG
- Event-based state estimation for delayed neural network systems with quantization 1555
Jinliang LIU, Jia TANG & Shumin FEI
- Public data evolution games on complex networks and data quality control 1569
Wenqi LIU
- Model checking generalized possibilistic computation tree logic based on decision processes 1591
Zhanyou MA & Yongming LI
- Group consensus in uncertain networked Euler-Lagrange systems with stochastic disturbances 1608
Zhonghua MIAO, Jun LIU, Guoqiang WANG & Jin ZHOU
- Mean-square consensus of heterogeneous multi-agent systems under Markov switching topologies 1621
Lipo MO & Tingting PAN
- Timing optimal control and reliability of uncertain data transmission systems with interval parameters 1633
Cailu WANG, Yuegang TAO, Peng YANG & Zuojun LIU
- Distributed consensus over digital noisy channel through reliable communications 1648
Zi WANG, Qiang ZHANG & Jifeng ZHANG

RESEARCH PAPER

- A TDC-based method for nano-scale displacement measurement and its error analysis 1662
Lu DENG, Chao ZHOU, Zhiqiang CAO, Shuo WANG & Min TAN
- Unification and simplification for position updating formulas in particle swarm optimization 1676
Jian HU, Wang HU & Feng YIN
