Main Contents

Special Focus on Ocean Information Systems

- Developing status and some cutting-edge issues of underwater sensor network localization technology 1121
Dajun SUN, Cuie ZHENG, Hongyu CUI, Jucheng ZHANG & Yunfeng HAN
- An overview of the underwater search and salvage process based on ROV 1137
Linyi GU, Qi SONG, Hongwei YIN & Jie JIA
- Research status of autonomous underwater vehicles in China 1152
Shuo LI, Jian LIU, Huixi XU, Hongyu ZHAO & Yiqun WANG

REVIEW

- Substrate integrated waveguide interconnects in high-speed electronic systems 1165
Xiaochun LI & Junfa MAO

RESEARCH PAPER

- Establishment and in-orbit test of optical link in satellite-to-ground quantum communication 1183
Liang ZHANG, Jianjun JIA, Shengkai LIAO, Guanhua WEN, Rong SHU & Jianyu WANG
- Distributed hybrid-triggered state estimation for complex net-worked system with network attacks 1198
Yushun TAN, Shumin FEI & Jinliang LIU
- Reconstruction of probabilistic Boolean networks 1214
Zhiqiang LI, Jinli SONG & Jian YANG
- Multiview-based group behavior analysis in optical image sequence 1227
Xuelong LI, Mulin CHEN & Qi WANG
- Consistent update of distance vector routing hybrid SDN networks 1242
Changhe YU, Julong LAN, Yuxiang HU, Yanfei ZHANG & Hao WANG

PERSPECTIVE

- Artificial intelligence: angel or devil? 1257
Tieniu TAN, Zhenan SUN & Zhaoxiang ZHANG
- A number of scientific and technical problems in intelligent transportation 1264
Bin NING
- Key scientific problems in the autonomous cooperation of manned-unmanned systems 1270
Jie CHEN & Bin XIN
- Study on the application of digital fiat currency in peer-to-peer investment and lending 1275
Qian YAO
