

Special Focus on Advanced Techniques for Event-Triggered Control and Estimation

Special focus on advanced techniques for event-triggered control and estimation150200(1)
Zhiyong CHEN, Qing-Long HAN, Zheng-Guang WU & Yamin YAN

How often should one update control and estimation: review of networked triggering techniques150201(18)
Zhiyong CHEN, Qing-Long HAN, Yamin YAN & Zheng-Guang WU

Dynamic output feedback control of systems with event-driven control inputs150202(14)
Jinhui ZHANG, Hao XU, Li DAI & Yuanqing XIA

Rotating consensus control of double-integrator multi-agent systems with event-based communication150203(10)
Rui DING, Wenfeng HU & Yanhua YANG

Event-based bipartite multi-agent consensus with partial information transmission and communication delays under antagonistic interactions150204(13)
Lulu LI, Xiaoyang LIU & Wei HUANG

Event-triggered neural network control of autonomous surface vehicles over wireless network150205(14)
Mingao LV, Dan WANG, Zhouhua PENG, Lu LIU & Haoliang WANG

Event-triggered hybrid impulsive control for synchronization of memristive neural networks150206(12)
Yijun ZHANG & Yuanguai BAO

Event-triggered attack-tolerant tracking control design for networked nonlinear control systems under DoS jamming attacks150207(18)
Xiaoli CHEN & Youguo WANG

Event-trigger-based consensus secure control of linear multi-agent systems under DoS attacks over multiple transmission channels150208(14)
Yang YANG, Yanfei LI & Dong YUE

Event-based triggering mechanisms for nonlinear control systems150209(12)
Yongfeng GAO, Ximing SUN, Xian DU & Wei WANG

Event-triggered receding horizon control via actor-critic design150210(15)
Lu DONG, Xin YUAN & Changyin SUN

Lyapunov-based event-triggered control for nonlinear plants subject to disturbances and transmission delays150211(15)
Xiaoda HU, Hao YU & Fei HAO

Adaptive event-triggered control for a class of nonlinear systems with periodic disturbances150212(15)
Hui MA, Hongyi LI, Renquan LU & Tingwen HUANG

RESEARCH PAPER

Application of gradient descent algorithms based on geodesic distances152201(11)
Xiaomin DUAN, Huafei SUN & Linyu PENG

Necessary and sufficient conditions for normalization and sliding mode control of singular fractional-order systems with uncertainties152202(10)
Bo MENG, Xinhe WANG, Ziyue ZHANG & Zhen WANG

MOOP

Anomaly detection by exploiting the tracking trajectory in surveillance videos154101(3)
Zixuan XUE & Wei WU

LETTER

An effective scheme for top- k frequent itemset mining under differential privacy conditions159101(3)
Wenjuan LIANG, Hong CHEN, Jing ZHANG, Dan ZHAO & Cuiping LI

Hybrid quantum particle swarm optimization algorithm and its application159201(3)
Yukun WANG & Xuebo CHEN

GotU: leverage social ties for efficient user localization159202(3)
Zidong YANG, Shibo HE & Jiming CHEN

Pattern-based validation metric for simulation models159203(3)
Yuanjun LAILI, Lin ZHANG & Yongliang LUO

Hybrid teaching-learning artificial neural network for city-level electrical load prediction159204(3)
Kangji LI, Xianming XIE, Wenping XUE & Xu CHEN

Study on stability in probability of general discrete-time stochastic systems159205(3)
Tianliang ZHANG, Feiqi DENG & Weihai ZHANG

Low-degree root-MUSIC algorithm for fast DOA estimation based on variable substitution technique159206(3)
Fenggang YAN, Ming JIN, Hongjuan ZHOU, Jun WANG & Shuai LIU

Adaptive NN impedance control for an SEA-driven robot159207(3)
Xinbo YU, Wei HE, Yanan LI, Chengqian XUE, Yongkun SUN & Yu WANG

Quasi-Newton method based control design for unknown nonlinear systems with input constraints159208(3)
Shuangshuang XIONG, Zhongsheng HOU & Chenkun YIN

Information for authors

SCIENCE CHINA Information Sciences (Sci China Inf Sci), cosponsored by the Chinese Academy of Sciences and the National Natural Science Foundation of China, and published by Science China Press, is committed to publishing high-quality, original results of both basic and applied research in all areas of information sciences, including computer science and technology; control science and engineering; information and communication engineering; microelectronics and solid state electronics, etc. *Sci China Inf Sci* is published monthly in both print and electronic forms.

Review (20 printed pages on average) surveys representative results and important advances on well-identified topics, with analyses and insightful views on the states of the art and highlights on future research directions.

Research Paper (no more than 15 printed pages) presents new and original results and significant developments in all areas of information sciences for broad readership.

MOOP (Multimedia Open Online Paper, with multimedia material) presents novel ideas, original research results, and significant developments in all areas of information sciences for broad readership.

Letter (no more than 3 printed pages) addresses issues of general interest with opinions or technical problems of research and development with solutions.

Sci China Inf Sci is now published under a brand new Continuous Article Publishing (CAP) workflow. That is, articles are published directly on line, together with complete publishing information concerning page, issue, volume and DOI.

Authors are recommended to use *Science China's* online submission services. To submit a manuscript, please go to www.scichina.com, create an account to log in <http://mc03.manuscriptcentral.com/scis>, and follow the instructions there to upload text and image/table files.

Authors are encouraged to submit such accompanying materials as short statements on the research background and area/subareas and significance of the work, and brief introductions to the first and corresponding authors including their mailing addresses with post codes, telephone numbers, fax numbers, and email addresses. Authors may also suggest several qualified experts (with full names, affiliations, phone numbers, fax numbers, and email addresses) as referees, and/or request the exclusion of some specific individuals from potential referees.

All submissions will be reviewed by referees selected by the editorial board. The decision of acceptance or rejection of a manuscript is made by the editorial board based on the referees' reports. The entire review process may take 90 to 120 days, and the editorial office will inform the author of the decision as soon as the process is completed. If the editorial board fails to make a decision within 90 days, please contact the editorial office.

Authors should guarantee that their submitted manuscript has not been published before and has not been submitted elsewhere for print or electronic publication consideration. Submission of a manuscript is taken to imply that all the named authors are aware that they are listed as coauthors, and they have agreed on the submitted version of the paper. No change in the order of listed authors can be made without an agreement signed by all the authors.

Ethical responsibilities of authors: Authors should refrain from misrepresenting research results which could damage the trust in the journal and ultimately the entire scientific endeavour, and follow the COPE guidelines on how to deal with potential acts of misconduct.

Disclosure of potential conflict of interests: Authors must disclose all relationships or interests that could influence or bias the work. The corresponding author will include a summary statement in the text of the manuscript in a separate section before the reference list.

Once a manuscript is accepted, the authors should send a copyright transfer form signed by all authors to Science China Press. Authors of one published paper will be presented one sample copy. If more sample copies or offprints are required, please contact the managing editor and pay the extra fee. The full text opens free to domestic readers at www.scichina.com, and is available to overseas readers at link.springer.com.
