Special Focus on Cyber Security in the Era of Artificial Intelligence
Guest Editors: Elisa BERTINO, N. ASOKAN, Zhenkai LIANG, Xinsheng JI, Xiaofeng TAO, Qi LI, Kui REN
Intelligent networking in adversarial environment: challenges and opportunities .................................................................170301(11)
Yi ZHAO, Ke XU, Qi LI, Haiyang WANG, Dan WANG & Min ZHU
Non-IID federated learning via random exchange of local feature maps for textile IIoT secure computing ................................170302(16)
Bo PENG, Mingmin CHI & Chao LIU
VulnGAN: a backdoor attack through vulnerability amplification against machine learning-based network intrusion detection systems ...........................................................................................................................................170303(19)
Guangrui LIU, Weizhe ZHANG, Xinjie LI, Kaisheng FAN & Shui YU
Reliable resource allocation with RF fingerprinting authentication in secure IoT networks ........................................................................170304(16)
Weifei WU, Su HU, Di LIN & Gang WU
Defensive deception framework against reconnaissance attacks in the cloud with deep reinforcement learning .................................170305(19)
Huanruo LI, Yunfei GUO, Shumin HUO, Hongchao HU & Penghao SUN
Certified defense against patch attacks via mask-guided randomized smoothing ..................................................................................170306(12)
Kui ZHANG, Hang ZHOU, Huanyu BIAN, Weiming ZHANG & Nenghai YU
ACCEL: an efficient and privacy-preserving federated logistic regression scheme over vertically partitioned data .................................170307(2)
Jiaqi ZHAO, Hui ZHU, Fengwei WANG, Rongxing LU, Hui LI, Zhongmin ZHOU & Haitao WAN
Post quantum secure fair data trading with deterability based on machine learning .................................................................170308(2)
Jinhui LIU, Yong YU, Hongliang BI, Yanqi ZHAO, Shijia WANG & Huanguo ZHANG

RESEARCH PAPER
Towards characterizing bug fixes through dependency-level changes in Apache Java open source projects ........................................172101(19)
Di CUI, Lingling FAN, Sen CHEN, Yuanfeng CAI, Qinghua ZHENG, Yang LIU & Ting LIU
SAND: semi-automated adaptive network defense via programmable rule generation and deployment ........................................172102(18)
Haoyu CHEN, Desing ZOU, Hai JIN, Shouhuai Xu & Bin YUAN
Extending generalized unsupervised manifold alignment .................................................................................................................172103(18)
Xiaoyi YIN, Zhen CUI, Hong CHANG, Bingpeng MA & Shiguang SHAN
Heterogeneous memory enhanced graph reasoning network for cross-modal retrieval ........................................................................172104(13)
Zhong JI, Kexin CHEN, Yuqing HE, Yanwei PANG & Xuelong LI
Pan-location mapping and localization for the in-situ science exploration of Zhurong Mars rover ..........................................................172201(15)
Xingguo ZENG, Jianjun LIU, Wei YAN, ZI WEI, Xingye GAO, Wangli CHEN, Wei ZUO & Chunhui LI
The impact of information dissemination on vaccination in multiplex networks ................................................................................172202(12)
Xiao-Jie LI, Cong LI & Xiang LI
Multicriteria optimization problems of finite horizon stochastic cooperative linear-quadratic difference games ........................................172203(13)
Chenchen PENG & Weihai ZHANG
Complex network approach for the evaluation of asphalt pavement design and construction: a longitudinal study ......................172204(15)
Hanjie LIU, Jinde CAO, Wei HUANG, Xili SHI & Xudong WANG
One-bit quantization is good for programmable coding metasurfaces ..............................................................................................172301(15)
Ya SHUANG, Hanting ZHAO, Menglin WEI, Qiang CHENG, Shi JIN, Tiejun CUI, Philipp DEL HOUGNE & Lianlin LI

MOOP
Common quantitative characteristics of music melodies — pursuing the constrained entropy maximization casually in composition ................................................................................................................................................174201(3)
Nan NAN, Xiaohong GUAN, Yixin WANG & Youhui DU

NEWS & VIEWS
Perspectives from the second Global Forum on Development of Computer Science .................................................................177101(2)
Andrew Chi-Chih YAO, Xia YIN, Yinqun LIU & Guoliang LI
LETTER
Communication and performance evaluation of 3-ary n-cubes onto network-on-chips .......................................................... 179101( 3 )
Weibei FAN, Jianxi FAN, Yujie ZHANG, Zhijie HAN & Guoliang CHEN
Locating multiple roots of nonlinear equation systems via multi-strategy optimization algorithm with sequence quadratic
program ........................................................................................................................................................................... 179102( 3 )
Jing LIANG, Boyang QU, Buolei LI, Kunjie YU & Caitong YUE
3DPF-FBN: video inpainting by jointly 3D-patch filling and neural network refinement ...................................................... 179103( 2 )
Yan HUANG, Chaunchuang YANG & Zhangyuan CHEN
An empirical study of security issues in SSO server-side implementations ................................................................................ 179104( 3 )
Hui WANG, Dawu GU, Yuanyuan ZHANG & Yikun HU
Malware incident response (IR) informed by cyber threat intelligence (CTI) .............................................................. 179105( 3 )
Ying HE, Ellis INGLUT & Chunlin LUO
Robust fixed-time output-feedback control for linear systems without chattering: an exact uncertainty compensation method...... 179201( 2 )
Shang SHI, Yonghui SUN, Yinlong HU & Xin YU
Fault estimation based on high order iterative learning scheme for systems subject to nonlinear uncertainties ....................... 179202( 2 )
Li FENG, Shuiqing XU, Ke ZHANG, Yi CHAI & Darong HUANG
MPC-based strategy for longitudinal and lateral stabilization of a vehicle under extreme conditions ................................. 179203( 2 )
Zihan LI, Ping WANG, Chaojie ZHU, Yunfeng HU & Hong CHEN
Time-scheduled observer design for switched linear systems with unknown inputs ............................................................. 179204( 2 )
Shuang SHI, Zhongyong FEI & Xudong ZHAO
Explicit construction of minimum bandwidth rack-aware regenerating codes .............................................................. 179301( 2 )
Liyang ZHOU & Zhihang ZHANG
A layered grouping random access scheme based on dynamic preamble selection for massive machine type communications .... 179302( 2 )
Gaofeng CHENG, Huan CHEN, Pingzhi FAN, Li LI & Li HAO
Automatic target recognition combining angular diversity and time diversity for multistatic passive radar ............................... 179303( 2 )
Xiaomao CAO, Jianxin YI, Ziping GONG & Xianrong WAN
Polarized spatial and directional modulation toward secure wireless transmission ........................................................... 179304( 2 )
Jiangong CHEN, Xia LEI, Yue XIAO, Hongyan ZHANG, Yuan DING & Gang WU

Information for authors

SCIENCE CHINA Information Sciences (Sci China Inf Sci), cosponsored by the Chinese Academy of Sciences and the National Natural Science Foundation of China, and published by Science China Press, is committed to publishing high-quality, original results of both basic and applied research in all areas of information sciences, including computer science and technology, control science and engineering, information and communication engineering, microelectronics and solid state electronics, etc. Sci China Inf Sci is indexed in Science Citation Index Expanded (SCIE), Engineering Index (EI), Journal Citation Reports/Science Edition (JCR), Academic OneFile, Astrophysics Data System (ADS), CSA, Cabels, Current Contents/Engineering, Computing and Technology, DBLP, Digital Mathematics Registry, Earthquake Engineering Abstracts, Engineering Materials Abstracts, Gale, Google, INSPEC, Mathematical Reviews, OCLC, ProQuest, SCOPUS, Summon by Serial Solutions, VINITI. Sci China Inf Sci is published monthly in both print and electronic forms.

Authors are recommended to use Science China’s online submission services. To submit a manuscript, please go to www.scichina.com, create an account to log in http:/mc03.manuscriptcentral.com/scis, and follow the instructions there to upload text and image/table files.

All submissions will be reviewed by referees selected by the editorial board. The decision of acceptance or rejection of a manuscript is made by the editorial board based on the referees’ reports. The entire review process may take 90 to 120 days, and the editorial office will inform the author of the decision as soon as the process is completed. If the editorial board fails to make a decision within 90 days, please contact the editorial office.

Authors should guarantee that their submitted manuscript has not been published before and has not been submitted elsewhere for print or electronic publication consideration. Submission of a manuscript is taken to imply that all the named authors are aware that they are listed as coauthors, and they have agreed on the submitted version of the paper. No change in the order of listed authors can be made without an agreement signed by all the authors.

Ethical responsibilities of authors: Authors should refrain from misrepresenting research results which could damage the trust in the journal and ultimately the entire scientific endeavour, and follow the COPE guidelines on how to deal with potential acts of misconduct.

Disclosure of potential conflict of interests: Authors must disclose all relationships or interests that could influence or bias the work. The corresponding author will include a summary statement in the text of the manuscript in a separate section before the reference list.

Once a manuscript is accepted, the authors should send a copyright transfer form signed by all authors to Science China Press. Authors of one published paper will be presented one sample copy. If more sample copies or offprints are required, please contact the managing editor and pay the extra fee. The full text opens free to domestic readers at www.scichina.com, and is available to overseas readers at link.springer.com.
